COMPLETION OF RANGE SCALES

For items where a line is drawn between two contrasting views, please place a firm vertical mark across the line at any position where you estimate that your own views or policies lie, e.g.

Does the child persevere when faced with a difficult problem?

Most of the time  Not at all

This means that on the majority of occasions the child does persevere.

Is the child distractible?

Easily  Not at all

This means that it is very difficult to distract the child.

For boxes of this kind, please use numerals, not words.

INTRODUCTION

The questionnaire which follows covers the educational and social environment of the study child as seen by the Class Teacher and School Head. A number of questions also assess the child's educational and other characteristics.

A fair and objective assessment of the facts and behaviours referred to in the document will be of considerable use in the fields of research and intervention and may help to guide the teaching of future generations.

Four areas are covered in the questionnaire. These are:

A. The child's educational status, as seen by the teacher. This provides information related to the educational, cognitive and motivational assessments to be carried out separately.

B. The child's social behaviour, as seen by the teacher. This information will be related to both the child's past home and school environments and to the future potential of the child in teenage and adult society.

C. The child's developmental behaviours, as seen by the teacher. This will focus in particular on behaviours and syndromes hypothesised to relate to perinatal events and the early environment.

D. The child's educational environment, as seen by the School Head and teacher. This will focus on classroom and curriculum factors and the educational ethos as supported and interpreted by the teacher and the head.

A. CHILD'S EDUCATIONAL STATUS
(TO BE COMPLETED BY CHILD'S TEACHER)

The items in this section deal with the child's educational activities and characteristics, and with several related issues.

(i) **THE CHILD AT SCHOOL**

A1 For how many months have you been teaching the study child? months

A2. Please assess the state of the child's general knowledge: *1504*

Very well informed	☐ 1	Somewhat below average	☐ 4
Somewhat above average	☐ 2	Extremely limited	☐ 5
Average for age	☐ 3		

A3 Could you please estimate how many hours a week the child is engaged in the following activities during school periods (Please write half an hour as 0.5 hours).

Registration, classroom preparation/tidying, other administrative activities	hours
Assembly and religious services	hours
Instructional reading work	hours
Reading for pleasure/information	hours

b. If any such defect is present, please describe:

.....

A24. Does the child use sign language at all?

Yes ☐ No ☐

If yes, which sign language system is used?

(iii) CHILD'S EDUCATIONAL CHARACTERISTICS

A25. How well does the child concentrate on educational tasks, in comparison with the average 10-year-old?

Cannot concentrate at all _____ Excellent concentration

A26. When the child is expected to be working, roughly what percentage of the time (i.e. within the period) would you describe the child's behaviour as:

Concentrating on the task in hand	_____ %
Interested in other tasks than the one which he has been given	_____ %
Talking to other children	_____ %
Moving around the classroom	_____ %
Fidgeting and indulging in other minor distracting activities	_____ %
Displaying serious behavioural aberrations	_____ %
Day-dreaming	_____ %
TOTAL	_____ %

A27. To what extent does the child accept the goals of the school's curriculum?

Complete acceptance _____ Complete hostility

A28. How much perseverance does the child show in the face of difficult tasks?

Unlimited _____ None

A29. To what extent does the child:

Work independently _____ Look to the teacher for guidance

(iv) INTEREST SHOWN BY CHILD'S PARENTS

Note Parents in the context of this questionnaire include parent figures or other adults responsible for the child's upbringing.

B. CHILD'S SOCIAL BEHAVIOUR
(TO BE COMPLETED BY CHILD'S TEACHER)

The questions here are related to the child's social functioning; the issues are important because of their relevance to the child's ability to function effectively when he moves into adult society.

- B1. a. We would be glad if you would add up the total number of days schooling missed by the child last term, for whatever reason (add half days as well):

Total days absent (round up to full days) days

- b. Please indicate reasons for absence and if possible estimate the days absent:

	Whether absent (mark all that apply)	
i1597 Illness	☐	days
i1598 Family bereavement	☐	days
i1599 Weather, transport problems	☐	days
i1600 Truanting	☐	days

i1602 Material hardship	☐	days
i1603 Helping family	☐	days
i1604 Not known	☐	days
i1605 Other (please specify)	☐	/s

i1895

- B2. Please make an estimate of how you see the child in regard to the following issues (please place a firm mark across the line at the appropriate point)

i1618 Is highly popular with his peers Is not at all popular with peers

i1619 Has no friends Has many friends

i1620 Shows extreme boldness of behaviour towards peers Shows extreme shyness in the company of peers

i1621 Very co-operative with peers Unwilling to co-operate with peers

- B3. To what extent can you negotiate with the child a change in his behaviour

i1622 Very easily Not at all

C. CHILD'S DEVELOPMENTAL BEHAVIOURS
TO BE COMPLETED BY CHILD'S TEACHER

In asking for your cooperation in describing the study child's behaviour within the categories described below we are not attempting to label or find particular fault with this or any other study child. Rather we are endeavouring to establish the links which are believed to exist between the child's birth and intervening medical and environmental history and the present pattern of behaviour. We would again emphasise our commitment to confidentiality, both of the child and the school, and we hope you will find it possible to answer these questions as frankly and fairly as possible.

Criteria against which the sample child's behaviours are to be scored are the 'average' behaviours of most children of a similar age. These items should be scored against your knowledge of the child — not by asking the child to perform any behaviours.

Unless otherwise stated, put a vertical mark at the appropriate point on each line to indicate the level of the particular behaviour (see page 2 for guidance). A fictional example implying that the child acts carelessly a lot of the time follows:

D. CHILD'S EDUCATIONAL ENVIRONMENT

(SECTION i : TO BE COMPLETED BY CHILD'S TEACHER)

(SECTIONS ii and iii : TO BE COMPLETED BY SCHOOL HEAD)

In regard to the following set of questions, the steps taken to ensure confidentiality of both the child and the school are such that there will be no possibility of identification of either in any reports appearing on this 10-year study. Questions concerning the school's policies and practices in certain fields of activity are aimed at building a picture of the educational ethos and philosophy and of how these vary across the country.

(i) CLASSROOM SITUATION (only applies to study child's class)

D1. When did the child join his/her present class?

Day Mnth Yr

--	--	--

D2. Number of pupils on the class register

	pupils
--	--------

D3. Please estimate how many children in the study child's class are receiving any of the following (if none, write none or 0):

Remedial reading help

Remedial mathematics help

Nurture group or other formal help with behavioural difficulties

	pupils
	pupils
	pupils

PLEASE NOTE: In a number of the following items, reference is made to a concept of the weekly class teaching time. The main purpose of these questions is to assess, as accurately as possible, the input of different levels of professional and lay resources into the class teaching situation of 10-year olds in Britain. Thus the above concept refers specifically to the hours of formal academic class activities. Items elsewhere in the questionnaire refer to time spent at Assembly and on sporting and other activities which are also clearly educational but are not seen as 'teaching time' in the ordinary sense.

The abbreviation weekly time refers to weekly class teaching time.

D4. Please estimate the total number of hours that can be defined as weekly class teaching time :
